==========

PROFESSIONAL SUMMARY

==========

Dynamic 400-Level Computer Engineering student with extensive coursework in embedded hardware, software systems, and CAD engineering. Demonstrated experience in designing, building, and deploying 4 full-stack production web applications. Proficient in C, C++, Python, JavaScript, TypeScript, React.js, Next.js, SolidWorks 3D CAD modeling, and cloud hosting workflows. Seeking Software Engineering internships and full-stack development roles.

==========

EDUCATION & RELEVANT COURSEWORK

==========

Bachelor of Science (B.Sc.) in Computer Engineering
Status: 400-Level, First Semester | Expected Graduation: 2028 (Year 5)

Comprehensive Computer Engineering Coursework:
• Embedded Systems Architecture & Microcontrollers (PIC, AVR, ARM, Arduino)
• SolidWorks 3D Mechanical CAD & Hardware Design
• Data Structures, Algorithms & Program Optimization
• Computer Networks, Protocols & Network Security
• Digital Logic Design, Circuit Analysis & VLSI Design
• Operating Systems, Process Management & Kernel Basics
• Database Systems, SQL & Data Modeling
• Software Engineering Principles & System Architecture

==========

TECHNICAL SKILLS & FRAMEWORKS

==========

• Programming Languages: C, C++, Python, JavaScript (ES6+), TypeScript, HTML5, CSS3/SASS, SQL.
• Frontend Frameworks & UI: React.js, Next.js, Vue.js, Vite, Tailwind CSS, Bootstrap, Material UI, WebGL (Three.js), Redux Toolkit, Context API.

• Hardware & Engineering Tools: SolidWorks 3D CAD, Proteus Circuit Simulator, MATLAB/Simulink, Git/GitHub, VS Code.
• Backend & Cloud DevOps: RESTful APIs, Node.js, Express, Vercel CI/CD, Postman API Testing.

==
FLAGSHIP PROJECTS (Ordered by Complexity)
==
1. Aether Cloud (Flagship #1) | Live: https://aethercloud.vercel.app
  • Interactive cloud topology simulator rendering distributed node clusters, WebGL graph viewports, serverless event loops, and cloud routing analytics.
  • Integrated Paystack payment gateway for transaction verification.

2. Nexus Luxe Store | Live: https://nexus-luxe-store-xi.vercel.app
  • Modern e-commerce storefront for luxury tech gear with dynamic search, category filter sidebar, shopping cart state management, and dark theme UI.

3. NexusFlow Kanban | Live: https://nexusflow-kanban.vercel.app
  • Multi-column task management board with status columns (To Do, In Progress, Code Review), priority tagging, dynamic task creation modal, and LocalStorage persistence.

4. NaijaGrid | Live: https://naijagrid.vercel.app
  • Community power grid availability monitor and verified local artisan network directory (electricians, plumbers, solar/inverter engineers) built using Next.js and Tailwind CSS.
